Third-Person shooter

License : Another Century's Episode

Devs : From Software

release date: January 13, 2011

Another Century's Episode Portable is a third-person shooter video game. Players pilot a mecha from one of 20 different anime series, each posing their own unique weapon load-outs and attack styles. Represented series include Mobile Suit Gundam 00, Macross F, and Aura Battler Dunbine, in addition to original mechas created specifically for the game. Players use these mechas to complete various mission objectives, which increase in difficulty as the player progresses. Objectives range from destroying waves of enemy mechas to protecting a specified target from opposing forces.

release date: June 3, 2014

1001 Spikes is a platform game developed by 8bits Fanatics and Nicalis, and published by Nicalis. Originally named Aban Hawkins & the 1001 Spikes, the game's objective is to escape a vast terrain and struggle to reach for victory without being impaled by spikes and many other disasters.

Jim Hawkins, a world-renowned archaeologist, has been lost within the frozen tundra of Antarctica. Before his disappearance, his daughter Tina is left with a map to the forgotten ruins of South America. Together with her estranged brother Aban, they explore the temple and try to retrieve their father's legacy.

IGN gave the game an 8/10, favoring its abundance of content and exhilarating disasters, while showing disappointment of the increasing repetition of the game as the levels advance.
